About Us

At Jay Randal Healthcare, we're passionate about improving the lives of pets through science-backed veterinary formulations. Our focus is clear to support animal health and wellbeing with safe, effective, and reliable products.

Backed by years of industry knowledge and a strong foundation in scientific expertise, we offer a carefully curated range of products designed specifically for companion animals. Each formulation is manufactured at our group's WHO-GMP certified facilities, ensuring global quality standards are met at every step from development to packaging.

We don't just make products we deliver trust. Every batch is supported with complete documentation and customized packaging, making it easier for our partners to meet local regulatory needs and succeed in competitive markets.

Whether you're a distributor, importer, or veterinary professional, Jay Randal Healthcare is your dependable partner committed to quality, consistency, and long-term collaboration. Together, we're working to make animal care better, everywhere.

Why Choose Us?

Choosing the right partner in veterinary pharmaceuticals means more than just sourcing products it's about reliability, long-term value, and shared vision. At Jay Randal Healthcare, we bring that difference.

Our strength lies in our sharp focus on companion animal health, offering a thoughtfully curated portfolio exclusively for dogs and cats. We understand that global markets demand not just quality, but also compliance, speed, and customization. That's why we go beyond manufacturing we provide regulatory ready documentation, tailor made packaging, and a team that responds with agility and precision.

We operate with the mindset of our partners: protecting your exclusivity, adapting to your needs, and ensuring timely deliveries, every time. Our commitment to ethical trade, technical excellence, and transparent communication has earned us the trust of distributors, veterinarians, and regulatory bodies across continents.

With Jay Randal Healthcare, you're not just choosing a product you're choosing a partner who understands what it takes to grow, compete, and lead in today's veterinary market.

CONTENTS

Ace inhibitor
Medications used in dogs and cats to manage heart failure and hypertension by inhibiting the angiotensin-converting enzyme, leading to vasodilation and reduced blood pressure.

Antibiotic
Antimicrobial agents used to treat bacterial infections by targeting cell wall synthesis, protein synthesis, or DNA replication.

Anticonvulsant
Medications used to prevent or control seizures in dogs and cats by stabilizing neuronal membranes and modulating neurotransmitter activity.

Antifungal
Agents used to treat fungal infections by disrupting fungal cell membrane integrity or inhibiting ergosterol synthesis in dogs and cats.

Antiprotozoal
Medications used to treat protozoal infections in dogs and cats by disrupting the growth and reproduction of protozoa.

Appetite stimulant
Medications used to enhance appetite in dogs and cats by acting on central or peripheral pathways that regulate hunger.

Dewormer
Antiparasitic agents used to eliminate internal parasites such as roundworms, hookworms, tapeworms, and whipworms in dogs and cats.

Hepatoprotective
Medications or supplements used to support liver function and protect liver cells from damage in dogs and cats.

NSAIDS
Non-steroidal anti-inflammatory drugs used in dogs and cats to reduce pain, inflammation, and fever by inhibiting cyclooxygenase (COX) enzymes.

Paw-sonal Compass:

Dogs can sense Earth's magnetic field and often align themselves north-south when relieving themselves.

JRHAMOX C-50

AMOXICILLIN & CLAVULANATE POTASSIUM TABLET USP 40/10 MG

Antibiotic

Composition:

Each Uncoated Chewable Tablet Contains:
Amoxicillin Trihydrate USP eq. to Amoxicillin ..... 40 mg
Clavulanate Potassium USP eq. to Clavulanic Acid ..... 10 mg
Excipients ..... q.s

Indications:

The combination of a penicillin-class antibiotic with a beta-lactamase inhibitor is indicated for the treatment of bacterial infections resistant to amoxicillin alone. It is used in cases of respiratory tract infections, pyoderma, urinary tract infections, and bite wounds. The smaller dose formulation suits cats and small dogs, providing targeted coverage with excellent safety.

Target Species:

Presentation

10 Tablets

Dosage & Administration:

12.5 mg/kg orally every 12 hours. Dose to be adjusted based on clinical condition.

JRHAMOX C-250

AMOXICILLIN & CLAVULANATE POTASSIUM TABLET USP 200/50 MG

Antibiotic

Composition:

Each Uncoated Chewable Tablet Contains:
Amoxicillin Trihydrate USP eq. to Amoxicillin ..... 200 mg
Clavulanate Potassium USP eq. to Clavulanic Acid ..... 50 mg
Excipients ..... q.s

Indications:

This higher strength formulation is intended for medium to large dogs requiring robust antibiotic therapy for skin, respiratory and urinary infections. The Clavulanic acid component ensures efficacy against beta-lactamase-producing bacteria. it is frequently used as a first-linetherapy in empiric treatment where polymicrobial involvement is suspected.

Target Species:

Presentation

10 Tablets

Dosage & Administration:

12.5 mg/kg orally every 12 hours. Treatment usually lasts 5 to 7 days or as recommended.

Cat-tastic Healing:

A cat's purr vibrates at 25–150 Hz, a frequency known to stimulate bone and tissue healing in both cats and humans.

JRJAZITHRO 100

AZITHROMYCIN TABLETS 100 MG

Antibiotic

Composition:

Each Uncoated Tablet Contains:
Azithromycin Dihydrate Eq. to Azithromycin ..... 100 mg
Excipients ..... q.s

Indications:

Azithromycin is a macrolide antibiotic used for treating upper respiratory tract infection, skin and soft tissue infections and infections caused by intracellular organisms such as Bartonella, Toxoplasma and Mycoplasma. It's excellent tissue penetration and prolonged intracellular retention makes it a preferred choice for persistent and atypical infections, especially in cats.

Target Species:

Presentation

10 Tablets

Dosage & Administration:

In dogs, the recommended dosage is 5 to 11mg /kg orally once daily for up to 7 days.
In cats, the recommended dosage is 5 to 16.5 mg/kg orally every 12 to 24 hours for up to 7 days.

JRHCLINDA 150

CLINDAMYCIN HYDROCHLORIDE TABLET 150 MG

Antibiotic

Composition:

Each Chewable Tablet Contains:
Clindamycin Hydrochloride USP ..... 150 mg
Excipients ..... q.s

Indications:

Clindamycin is indicated for the treatment of deep pyoderma, dental infections, osteomyelitis, abscesses and wounds in dogs and cats. It is particularly effective against anaerobic bacteria and gram-positive cocci. Often used in post-dental procedures, Clindamycin also provides excellent tissue penetration, especially in bone and dental tissues.

Target Species:

Presentation

10 Tablets

Dosage & Administration:

The recommended dose for cats is 11 to 33 mg/kg once every 24 hours and the recommended dose for dogs is 5.5 to 33 mg/kg every 12 hours for a maximum of 28 days.

Heart to Heart:

When your dog looks into your eyes, both of you release oxytocin, the love hormone — the same one released between a mother and child.

JRHDOX 50

DOXYCYCLINE 50 MG TABLET

Antibiotic

Composition:

Each Chewable Tablet Contains:
Doxycycline Hyclate Eq. to Doxycycline ..... 50 mg
Excipients ..... q.s

Indications:

Doxycycline is a versatile, broad-spectrum tetracycline antibiotic indicated for the treatment of a wide range of infections including tick-borne diseases (e.g., Ehrlichiosis, Anaplasmosis, Babesiosis), respiratory tract infections, urinary tract infections, and leptospirosis. It also plays a key role in the management of Mycoplasma, Chlamydia, and Periodontal infections.

Target Species:

Presentation

10 Tablets

Dosage & Administration:

The dose rate for cats and dogs is 5 mg/kg body weight as a loading dose, then 2.5 mg/kg every 12 hours for two doses then a maintenance dose of 2.5 mg/kg every 24 hours.

JRHDOX 50

DOXYCYCLINE 50 MG TABLET

Antibiotic

Composition:

Each Chewable Tablet Contains:
Doxycycline Hyclate Eq. to Doxycycline .....100 mg
Excipients ..... q.s

Indications:

Doxycycline is a versatile, broad-spectrum tetracycline antibiotic indicated for the treatment of a wide range of infections including tick-borne diseases (e.g., Ehrlichiosis, Anaplasmosis, Babesiosis), respiratory tract infections, urinary tract infections, and leptospirosis. It also plays a key role in the management of Mycoplasma, Chlamydia, and Periodontal infections.

Target Species:

Presentation

10 Tablets

Dosage & Administration:

The dose rate for cats and dogs is 5 mg/kg body weight as a loading dose, then 2.5 mg/kg every 12 hours for two doses then a maintenance dose of 2.5 mg/kg every 24 hours.

Feline GPS:

Lost cats have an uncanny ability to find their way home from miles away using scent markers and earth's geomagnetic cues.

JRHZOLE 50

ITRACONAZOLE TABLET 50 MG

Antifungal

Composition:

Each Uncoated Tablet Contains
Itraconazole USP ..... 50 mg
Excipients ..... q.s

Indications:

Itraconazole is systemic antifungal agent used for the treatment of various fungal infections, including dermatophytosis (ringworm), blastomycosis, cryptococcosis, histoplasmosis and aspergillosis. It is particularly beneficiat for long-term control of deep mycotic infections due to its broad-spectrum activity and lipophilic nature, which allows effective tissue penetration.

Target Species:

Presentation

10 Tablets

Dosage & Administration:

The dose for dogs is 5.5 mg/kg every 12 to 24 hours or as directed by veterinarian.
The dose for cats is 5.5 to 11 mg/kg every 12 to 24 hours or as directed by veterinarian.

JRHZOLE 100

ITRACONAZOLE TABLET 100 MG

Antifungal

Composition:

Each Uncoated Tablet Contains
Itraconazole USP .....100 mg
Excipients ..... q.s

Indications:

Itraconazole is systemic antifungal agent used for the treatment of various fungal infections, including dermatophytosis (ringworm), blastomycosis, cryptococcosis, histoplasmosis and aspergillosis. It is particularly beneficiat for long-term control of deep mycotic infections due to its broad-spectrum activity and lipophilic nature, which allows effective tissue penetration.

Target Species:

Presentation

10 Tablets

Dosage & Administration:

The dose for dogs is 5.5 mg/kg every 12 to 24 hours or as directed by veterinarian.
The dose for cats is 5.5 to 11 mg/kg every 12 to 24 hours or as directed by veterinarian.

Did you know?

Dogs can sense your emotions just by smelling your sweat — joy, fear, and stress all have unique scents to them.

JRHGABA 50

GABAPENTIN TABLET 50 MG

Anticonculsant

Composition:

Each Chewable Tablet Contains:
Gabapentin USP ..... 50 mg
Excipients ..... q.s

Indications:

Gabapentin is indicated for the management of chronic neuropathic pain arising from conditions such as osteoarthritis, intervertebral disc disease of nerve trauma. It is also used as an adjunctive therapy in seizure disorders and anxiety-related conditions. Gabapentin offers a vell- tolerated solution for long term pain control, especially in senior pets or those with spinal sensitivity.

Target Species:

Presentation

10 Tablets

Dosage & Administration:

The dose for dogs 10 to 20 mg/kg orally every 8 hours in combination with other anticonvulsants to treat refractory seizures.
5 to 10 mg/kg orally every 8 to 12 hours when used as an analgesic to treat pain.
The dose for cats Initial dosages of 5 to10 mg/kg orally every 8 to 12 hours to treat seizures.
5 to 10 mg/kg orally every 8 to 12 hours for chronic pain.

JRHMETRO 200

METRONIDAZOLE TABLETS USP 200 MG

Antiprotozoal

Composition:

Each Chewable Tablet Contains:
Metronidazole ..... 200 mg
Excipients ..... q.s

Indications:

Metronidazole is effective in treating anaerobic bacterial infections and protozoal diseases such as giardiasis, trichomoniasis and Clostridium-associated colitis. It is also indicated for periodontal infections, hepatic encephalopathy and chronic inflammatory gastrointestinal conditions. Metronixazole offers both antimicrobial and anti-inflammatory properties, making it a valuable therapeutic option in mixed-pathogen conditions

Target Species:

Presentation

10 Tablets

Dosage & Administration:

The dose for dogs is 5 to 20 mg/kg of your pet's body weight, by mouth, in divided doses depending on condition of the individual pet being treated.

The dose for cats is 3 to 20 mg/kg of your pet's body weight, by mouth, in divided doses depending on condition of the individual pet being treated.

Nap Experts:

Cats sleep for about 70% of their lives —
yet they're always alert when it counts.

AZITHROMYCIN

ORAL SUSPENSION 100 mg/5 ml

Antibiotic

Composition:

Each 5 ml contains:
Azithromycin Dihydrate B.P. Equivalent to Azithromycin ..... 100 mg
Excipients .....q.s.

Indications :

Azithromycin is a macrolide antibiotic with excellent tissue penetration, ideal for treating skin, respiratory, and soft tissue infections. It is especially useful in treating Bartonella, Toxoplasma, and Mycoplasma infections.

Dosage & Administration :

The dose for dogs administer 5.5 to 11 mg /kg orally once daily for up to 7 days.
The dose for cats administer 5.5 to 16.5 mg/kg orally every 12 to 24 hours for up to 7 days.

Pack Size:

50 ml

Target species :

BENAZEPRIL

ORAL SOLUTION 2 mg/ml

Ace inhibitor

Composition:

Each ml Contains:
Benazepril HCL USP ..... 2 mg
Excipients ..... q.s

Indications :

Benazepril is an ACE inhibitor used in dogs and cats for treating congestive heart failure, protein-losing nephropathy, and systemic hypertension. It helps reduce blood pressure and proteinuria.

Dosage & Administration :

0.25 to 0.5 mg/kg orally once daily. Dosage may be adjusted depending on blood pressure, creatinine, and urine protein levels.

Pack Size:

30 ml

Target species :

Unspoken Loyalty:

A dog's heartbeat can sync with their human's when they cuddle or sit close.

CARPROFEN

ORAL SOLUTION 10 mg/ml

NSAIDS

Composition:

Each ml Contains:
Carprofen USP ..... 10 mg
Excipients ..... q.s

Indications :

Carprofen is a non-steroidal anti-inflammatory drug (NSAID) indicated for the relief of pain and inflammation in dogs with osteoarthritis, orthopedic conditions, or undergoing surgery.

Dosage & Administration :

2.2 mg/kg once daily or 1.1 mg/kg twice daily. Should be administered with food, and regular liver/kidney monitoring is advised for long-term use.

Pack Size:

50 ml

Target species :

DOXYCYCLINE

ORAL SOLUTION 20 mg/ml

Antibiotic

Composition:

Each ml Contains:
Doxycycline B.P ..... 20 mg
Excipients ..... q.s

Indications :

Doxycycline is a versatile, broad-spectrum tetracycline antibiotic indicated for the treatment of a wide range of infections including tick-borne diseases (e.g., Ehrlichiosis, Anaplasmosis, Babesiosis), respiratory tract infections, urinary tract infections, and leptospirosis. It also plays a key role in the management of Mycoplasma, Chlamydia, and Periodontal infections.

Dosage & Administration :

5 to 10 mg/kg orally every 12 to 24 hours for 7 to 14 days. Ensure adequate hydration to reduce gastrointestinal irritation.

Pack Size:

30 ml

Target species :

The Nose Knows:

A dog's sense of smell is so sharp, they can detect cancer, diabetes, and even seizures before they happen.

ENROFLOXACIN

ORAL SOLUTION 10 mg/ml

Antibiotic

Composition:

Each ml Contains:
Enrofloxacin ..... 10 mg
Excipients ..... q.s

Indications :

Enrofloxacin is a powerful fluoroquinolone antibiotic effective against gram-negative and gram-positive infections of the skin, urinary tract, gastrointestinal system, and respiratory tract. It is widely used in both acute and chronic infections.

Dosage & Administration :

5 to 20 mg/kg orally once daily for 5 to 10 days.

Pack Size:

50 ml

Target species :

GABAPENTIN

ORAL SOLUTION 10 mg/ml

Anticonvulsant

Composition:

Each ml Contains:
Gabapentin ..... 10 mg
Excipients ..... q.s

Indications :

Gabapentin is used for managing chronic pain related to arthritis, nerve injury, cancer, and also serves as an adjunct therapy for seizures in dogs and cats. It offers excellent safety for long-term use and is particularly useful for anxious or neurologically sensitive pets.

Dosage & Administration :

5 to 10 mg/kg orally every 8 to 12 hours. Gradual dose titration and withdrawal are advised to prevent rebound pain or seizure recurrence.

Pack Size:

50 ml

Target species :

Paw Preference:

Like humans, cats and dogs can be right-pawed or left-pawed — studies show 50/50 dominance.

ITRACONAZOLE

ORAL SOLUTION 20 mg/ml

Antifungal

Composition:

Each ml Contains:
Itraconazole B.P. ..... 20 mg
Excipients ..... q.s

Indications :

Itraconazole is a broad-spectrum antifungal used for treating systemic and superficial fungal infections in pets. It is particularly effective against dermatophytosis (ringworm), blastomycosis, cryptococcosis, and aspergillosis. The oral solution form ensures better absorption, especially in cats.

Dosage & Administration :

The solution should be administrated orally using the enclosed graduated dosing syringe. The daily dosage is 5 mg/kg body weight administered once daily on alternating weeks for 3 treatment cycles.

Pack Size:

50 ml

Target species :

METRONIDAZOLE

ORAL SUSPENSION 50 mg/ml

Antiprotozoal

Composition:

Each ml Contains:
Metronidazole Benzoate B.P. Equivalent to Metronidazole ..... 50 mg
Excipients ..... q.s

Indications :

Metronidazole is indicated for treating protozoal infections such as giardiasis and anaerobic bacterial infections in dogs and cats. It is commonly used to manage gastrointestinal conditions including colitis, inflammatory bowel disease (IBD), and periodontal infections. Additionally, metronidazole may help reduce ammonia levels in hepatic encephalopathy cases.

Dosage & Administration :

For Dogs : The recommended dose is 5-20 mg/kg of your pet's body weight, by mouth, in divided doses depending on condition of the individual pet being treated.

For Cats : The usual dose is 3-20 mg/kg of your pet's body weight, by mouth, in divided doses depending on condition of the individual pet being treated.

Pack Size:

50 ml

Target species :

Sniff Memories:
A dog remembers each scent for life —
even if they haven't seen you in years.

MELOXICAM

ORAL SUSPENSION 0.5 mg/ml

NSAIDS

Composition:

Each ml Contains:
Meloxicam E.P. ..... 0.5 mg
Aqueous Base..... q.s

Indications :

Meloxicam is an NSAID for treating pain and inflammation in cats due to osteoarthritis, injury, or surgery.

Dosage & Administration :

Initial dose: 0.1 mg/kg orally, followed by 0.5 mg/kg once daily. Use the lowest effective dose and monitor kidney/liver parameters during prolonged use.

Pack Size:

30 ml

Target species :

MELOXICAM

ORAL SUSPENSION 1.5 mg/ml

NSAIDS

Composition:

Each ml Contains:
Meloxicam E.P. ..... 1.5 mg
Aqueous Base..... q.s

Indications :

Meloxicam is an NSAID for treating pain and inflammation in dogs due to osteoarthritis, injury, or surgery.

Dosage & Administration :

Initial dose: 0.2 mg/kg orally, followed by 0.1 mg/kg once daily. Use the lowest effective dose and monitor kidney/liver parameters during prolonged use.

Pack Size:

30 ml

Target species :

Meow Mix Language:

Cats only meow at humans —
they developed this "language" just to talk to us.

MIRTAZAPINE

ORAL SOLUTION 2 mg/ml

Appetite stimulant

Composition:

Each ml Contains:
Mirtazapine USP ..... 2 mg
Excipients ..... q.s

Indications :

Mirtazapine is an appetite stimulant and anti-nausea agent useful in inappetent cats and dogs suffering from chronic kidney disease, gastrointestinal disorders, or chemotherapy-induced nausea.

Dosage & Administration :

Cats: 3.75 mg every 24 to 48 hours. Dogs: 0.6 mg/kg once daily.
Dosage may be adjusted based on clinical response.

Presentation

30 ml

Target species :

PRAZIQUANTEL 25 MG + PYRANTEL 72 MG + FENBENDAZOLE 250 MG

ORAL SUSPENSION

Dewormer

Composition:

Each 5 ml Contains :
Praziquantel B.P ..... 25 mg
Pyrantel (As Pyrantel Pamoate) B.P ..... 72 mg
Fenbendazole B.P ..... 250 mg
Excipients ..... q.s

Indications :

This triple-action deworming combination (Praziquantel 25 mg + Pyrantel 72 mg + Fenbendazole 250 mg per 5 ml) provides broad-spectrum protection against tapeworms, hookworms, roundworms, and whipworms in both dogs and cats.

Dosage & Administration :

1 ml per 5 kg body weight once daily for 3 consecutive days, or as advised by the veterinarian.

Pack Size:

30 ml

Target species :

Emotional Mirrors:

Dogs can mirror your mood —
they get excited when you're happy, and
they cuddle when you're down.

URSODEOXYCHOLIC ACID

ORAL SUSPENSION 50 mg/ml

Hepatoprotective

Composition:

Each ml Contains:
Ursodeoxycholic Acid B.P. ..... 50 mg
Excipients ..... q.s

Indications :

This bile acid is indicated for managing liver diseases involving cholestasis, gallbladder sludge, and hepatobiliary inflammation. It enhances bile flow and has immunomodulatory properties in dogs and cats.

Dosage & Administration :

10 to 15 mg/kg once daily or divided into two doses. Regular liver function monitoring is recommended during long-term use.

Cats Walk Like Tall Giraffes!

Cats walk by moving both left legs first and then both right legs — a gait shared only with camels and giraffes.

Precision Hearing:

Cats have over 30 muscles in each ear, allowing them to pinpoint even the faintest sounds with extreme precision.

The Face Reader:

Dogs have been shown to recognize human facial expressions and can tell when you're smiling or upset.
