COMPANY INTRODUCTION

Hangzhou Evegen Biotech Co., Ltd is an R&D - based biotech company, with a highly experienced technical team in genetic engineering and the IVD immunoassay field. We have well - established veterinary drug GMP facilities and biosafety level - II laboratories. All production activities are under the control of ISO9001, ISO14001 and ISO45001.

Evegen has generated a brand called VETDiagnostix for the global market. This brand serves as a fast diagnostic solution tool to all veterinarians who are practicing on companion animals, exotic pets, farm animals, equine animals and even wild animals. Under the brand, a wide range of product lines have been generated, including the following series.

Not like other competitors, we develop the proteins and antibodies for immunoassay by our scientific team. All the technicians have extreme R&D efficiency in developing new products for veterinary diagnosis in unbelievable speed. We care about the potential demand in veterinary practice and have capability to design products for veterinarians to find our the problem efficiently. Typically, we have good experience in designing and developing products for multi-species zoonosis diseases.

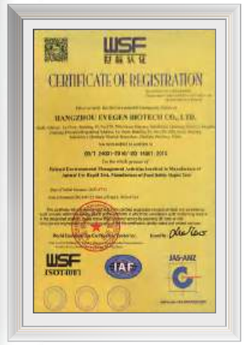

For an intelligent analysis, the Evegen team has developed a Generation II dry immunoassay analyzer. It could be linked with cloud and help veterinarians to analyze the results of rapid test for both biomarkers and infectious diseases.

GMP

CERTIFICATE OF GOOD MANUFACTURING PRACTICES FOR ANIMAL DRUGS

ISO14001

ISO45001

ISO9001

Our vision: Any disease on any species could be detectable in 10 minutes.

PRODUCT INTRODUCTION

WHAT DO WE HAVE

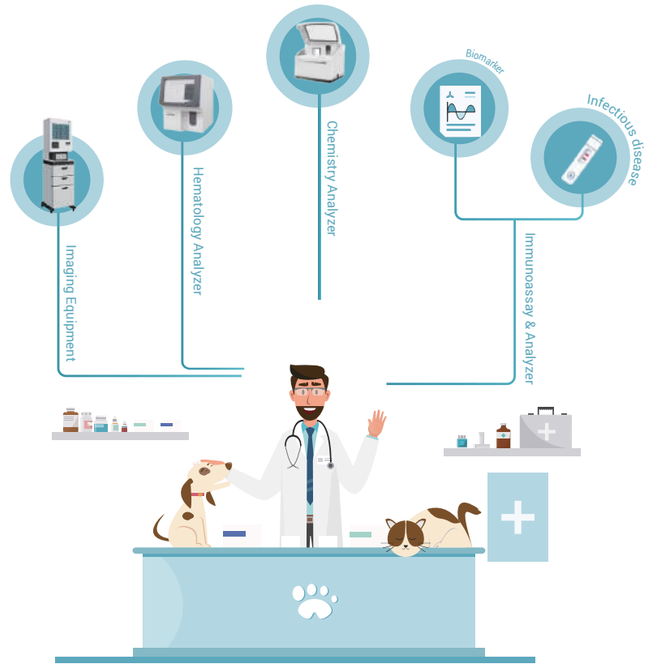

- Rapid tests for dogs & cats
- Rapid tests for exotic pet birds & reptile & rabbits & turtles
- Rapid tests for bovine & poultry & swine & sheep & goats & camels
- Rapid tests for equine animals
- Rapid tests for wild animals

Lateral flow immunoassay

ELISA kits

- ELISA kits for bovine & poultry & swine & sheep & goats
- ELISA kits for equine animals

ANALYZER INTRODUCTION

INTELLIGENT PET HOSPITAL

VETSEE G2

DRY IMMUNOASSAY ANALYZER

The VETDiagnostix VETSEE G2 Dry Immunoassay Analyzer is a 2nd generation immunoassay analyzer applicable for all pet clinics to use in their practice. It provides a quickly instrumental way to help veterinarians to get a more precise result interpreta tion when using a rapid test under the brand VETDiagnostix. Typically, either quantitative results on biomarkers or Semi-quantitative results on infectious diseases could be analyzed with this analyzer. All the data of results could be unlimitedly stored on the client of the software for many years which could be easily reviewed by the vet doctors for historical record. Any of the testing report could be easily exported into PDF file and share with the patient's owner.

Professional reports

After the detection is completed, the reports can be conveniently exported as PDF files, making it easy for you to view and save them.

Rich variety of detectable species

The analyzer features a rich variety of detectable species, ranging from common domestic pets to exotic pets.

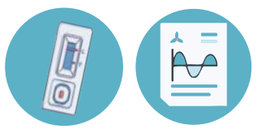

Cloud Data

Within the software client, all result data can be retained indefinitely, allowing veterinarians to conveniently retrieve them for reference as historical records even after many years.

Rich detection items

The analyzer can accommodate more than 100 detection items, which can fully meet all kinds of detection needs.

Integrate multiple detections into one

Both biomarkers and infectious diseases can be detected.
